

BHAVESH PARMAR

Python Developer — AI/ML Enthusiast

☎ +91-9427426823 ✉ parmarraj3010@gmail.com 🔗 [linkedin.com/in/bhavesHParmar](https://www.linkedin.com/in/bhavesHParmar) 🐙 github.com/bhavesHParmar

Summary

Python Developer and AI/ML Enthusiast with knowledge of Machine Learning, Data Analysis, Django, and REST API development. Skilled in Python, Pandas, NumPy, and Scikit-learn, with experience building machine learning applications including Customer Churn Prediction and Spam Detection systems. Seeking an AI/ML Internship or Entry-Level Python Developer opportunity.

Skills

Programming Languages: Python, SQL, JavaScript, HTML, CSS

Machine Learning: Scikit-learn, Pandas, NumPy, Data Preprocessing, Classification

Frameworks: Django, Django REST Framework (DRF), React.js

Databases and Tools: MySQL, Git, GitHub, Postman

Concepts: Machine Learning Basics, REST APIs, JWT Authentication

Education

M.Sc. Information Technology - Final year

Dr. Babasaheb Ambedkar Open University (BAOU), Gujarat

Aug 2024 - Jun 2026

Current CGPA: 7.3 / 10

Bachelor of Computer Application

Gujarat University, Ahmedabad (Gujarat)

Jun 2021 - May 2024

CGPA: 7.24 / 10

Experience

FxIsai (Remote)

Full Stack Intern

May 2025 – August 2025

- Worked on frontend and backend development using Django REST Framework and React.js.
- Developed and tested REST APIs for authentication and user management features.
- Designed responsive user interfaces using React.js and Tailwind CSS.
- Used Git and GitHub for version control and project management.

Projects

Customer Churn Prediction System — Python, Django, Scikit-learn

2026

- Developed a Logistic Regression model to predict customer churn using telecom customer data.
- Performed data preprocessing, feature encoding, and model evaluation using Pandas and Scikit-learn.
- Integrated the trained model with Django and achieved 82% prediction accuracy.

AI-Based Spam Detection System — Python, Django, Scikit-learn

2025

- Built a machine learning application to classify SMS messages as Spam or Ham using Natural Language Processing (NLP).
- Applied text preprocessing techniques and TF-IDF vectorization for feature extraction.
- Trained and evaluated a Naive Bayes classification model for spam detection.
- Developed a Django-based web interface for real-time message prediction.

Certifications

- Internship Studio – Aptitude Test (2024), Great Learning – React.js (2024), Digital Adda – HTML/CSS/JavaScript (2024)
